

Amendments to the Specification

Please replace the paragraph beginning at page 17, line 5, with the following rewritten paragraph:

As can be appreciated, the information in Figures 9-13 can be thought of as packet-centric information, since it is inherent from the packet samples. On the other hand, the information in Figure 14 can be ~~through~~ thought of as path-centric information, since it has to do with the known and/or expected path of the packet through the network(s).
